

#### Proverbs 18:15

An intelligent heart acquires knowledge, and the ear of the wise seeks knowledge.

Through our years of running this Biblical Parenting Coaching Program, we have learned much from you and your clients. As an attempt to systematically compile and learn from all our coaches and clients around the world, we are incorporating a research component to the program.

We value your ongoing partnership with us to assist in our data collection efforts as you meet with your clients. Here's what we'll need from you:

### 1. Child Behavior Inventory (CBI) https://biblicalparenting.org/childbehaviorinventory/

As you do your usual administrative intake routines (e.g. Coaching Agreement, BPU 301P, payment, etc.), include the Child Behavior Inventory for your client to fill out. This objective assessment will serve as our main baseline measure and will again be administered at the end as the final measure; meaning parents have to fill out the CBI twice: once at the beginning and again at the end of the program. Having a pretest-posttest measure will enable us to statistically evaluate how effective our program is and where exactly changes have occurred.

#### 2. Intake Form

The Intake Form consists of demographic and family background information that will help us understand families within their individual geographic, cultural, and socioeconomic contexts. Please remove their names as we don't need them and as a protection of their privacy.

#### 3. Weekly Questions

At the beginning of your weekly meetings, start by asking them these 4 research questions which they will answer on the corresponding scales. These questions will help us track their weekly progress to identify the critical points to heart change.

1. Rate how much you were able to work with your child this week.

1	2	3	4	5	6
Not at all	Hardly ever	Occasionally	Often	Lots	A whole lot
	(only once)	(a few times a week)	(more often than not)	(at least once a day)	(everyday, many times a day)

## 2. Rate how your child is responding to the program in general.

1	2	3	4	5	6
Things have gotten worse	Not at all (still the same)	Not much	Some	Lots	A whole lot

# 3. Rate how your child is responding to Cycle #1.

1	2	3	4	5	6
Did not implement	Very poorly (hostile)	Poorly (complies with bad attitude)	Somewhat well (responds well more often than not)	Well (occasional slip ups)	Very well (with a joyful heart)

## 4. Rate how your child is responding to Cycle #2.

1	2	3	4	5	6
Did not implement	Very poorly (hostile)	Poorly (complies with bad attitude)	Somewhat well (responds well more often than not)	Well (occasional slip ups)	Very well (with a joyful heart)

### 4. Weekly Status Reports

The weekly notes you keep after meeting with your client will help us understand the struggles and victories of real families. We will use your notes to look for themes and patterns that emerge when compared with hundreds of other families around the world.

### 5. Parent Evaluation Form

This evaluation at the end of the program allows parents to give specific feedback to the various components of the program.

You're also encouraged to check out the CBI webpage, BPU 301 and BPU 301P portals before you begin a new client as we are regularly updating the assessment tools, research questions, forms, and teaching materials.

Here's a summary of all the documents we'll need. You may compile these documents and send them all at once at the end of the program to Esme at <a href="mailto:sme2911@gmail.com">sme2911@gmail.com</a>

Remember to remove all names and other identifying information from the documents to protect your clients' privacy.

	Research: Data Collection Documents
